By harnessing the power of Emotional Intelligence, leaders can apply these attributes to motivate and engage their teams, strengthen cooperation and increase performance.

Utilizing participants' completed EQ-i 2.0 self-assessments from MHS as a backdrop, **Leading With Emotional Intelligence** incorporates a variety of adult learning and skill building techniques, such as peer-driven group discussions, triad role-playing, action planning and self-directed developmental activities. specific observations and communication of tangible next steps to drive performance.
